### 7. Sand and Turf Ratings

1. Wins and places are cumulative on both surfaces.
2. A maiden with three runs on one surface who shows improvement on another surface over a similar distance, may have dual ratings which will be official after three runs; if still a maiden.  
  
2.b) Horses 4 years and older and who are the winner of a race; whose rating is NOT on an upward trend; shows improvement on a new surface may have dual ratings. The handicappers must be satisfied that there is a discernable difference between the two ratings. Horses without Sand form; that are relocated to Flamingo Park; will be re-assessed after 2 meritorious runs and to best achieved within 3 meritorious runs.
3. Should a 2 or 3-year-old horse which has form on one surface go on to show improvement on another surface, it is reasonable to assume that the horse has improved with maturity. If the rating goes up on one surface the rating on the other surface may increase at the discretion of the handicapper.
4. A horse with 5 or more handicap runs on a surface will be deemed to be established on that surface.
5. The handicappers reserve the right to increase the lesser rating by 50% of the relative improvement should a horse have made exceptional (more than 8lb) improvement over a different aptitude, gelding, equipment change, distance, trainer change etc.
6. The layoff allowance (if applicable- See 8 below); will apply to both ratings.
7. Margins on the Vaal Sand and at Flamingo Park to be treated at 75% of turf length/distance factor.
